

In the applications requiring an extension of the low frequency response, W24A combines perfectly with the Montarbo active subwoofer 218SA.

one W24A + one 218SA

active sub (1500W) with built-in stereo electronic X-over (100Hz, 24dB/oct)

two W24A + one 218SA

active sub (1500W) with built-in stereo electronic X-over (100Hz, 24dB/oct)

The above suggested combinations of subwoofers + active speaker systems are 'technically correct', but they do not take into consideration all the different possible situations and configurations, nor the individual requirements of power and sound distribution.
